

August...

Rest in Peace...March 14, 2006

August was a wonderful, young Quarter Horse gelding.

He came to Trail of Hope with advanced cataracts in both eyes, most likely caused by poor nutrition and care. When he was rescued by a local sheriff's department he was ranked a one on the American Humane scale for body condition.

August was up to a healthy weight and we had started working with him in natural horsemanship activities. His confidence increased markedly, the natural horsemanship approach appeared to be just what he needed.

Sadly, August became quite ill in early March. August put up a brave fight for a week in the ICU; however his lungs were just not strong enough to keep him going. August left us to run free and strong on March 14, 2006.

When he came to us, we named him August to reflect the dignity and magnificence he brought to life and found it was just as fitting for how he approached his end with us.

He is loved and missed by all of us at Trail of Hope, especially his benefactor and sponsor, Sharon Adams.
